

Dear Presidents of the Humboldt Clubs of Europe Dear Humboldtians and friends,

Societas Humboldtiana Polonorum, a scientific Society joining the Polish Humboldtians organizes this year two Humboldt meetings

26-29. Mai 2011 in Wrocław NUTRACEUTICS, BIOMEDICAL REMEDIES AND
PHYSIOTHERAPEUTIC METHODS FOR PREVENTION OF CIVILIZATION-RELATED DISEASES

The increasing wealth of societies has an important effect on their ideas about the quality of life, limiting morbidity, extending life expectancy, slowing down the process of ageing etc. The progress in medicine and nutritional science makes it possible to create possibilities for the production on natural, new generation preparations, such as functional foods, diet supplements or nutraceuticals, which help prevent civilization-related diseases. The use of such new substances must, however, be accompanied by healthy style of life.

25-28. September 2011 in Gdansk HOW SCIENCE SPIES ON AND TECHNOLOGY IMITATES
NATURE?

devoted to various problems connected with science, technology and our life.

The meetings are a good opportunity not only to discuss scientific issues but also to meet other colleagues and close acquaintance with Poland.

The Humboldtians from around the world are cordially invited. Participation is free for Humboldtians, but unfortunately we cannot cover your travel expenses.

We would ask you to spread this message among the colleagues and for their fast registration we will be very grateful (we have to present a participant's list in Bonn asap).

A registration form is enclosed. For each meeting please fulfill the form separate.

The deadline for registration is 11 March 2011.

Best regards,

Marian Jaskula
General secretary
Societas Humboldtiana Polonorum
